Full-Stack Developer

Experience

Full-Stack Developer

Koffeecup
2022.10 – Present

Throughout my career, I have had the opportunity to work on diverse projects, allowing me to gain hands-on experience with various technologies, including Vue, Svelte, Nest.js, PlayCanvas, and Firebase. In one project I was responsible for setting up CI/CD integrations using GitHub Actions to streamline development workflows. Additionally, I worked on analytics solutions for clients, which introduced me to BigQuery and Tableau. One of my tasks was to integrate an application hosted on Firebase with a custom domain hosted on AWS using Route 53 and S3. I have extensive experience with Node.js, developing everything from simple Restfull APIs to more complex functionalities such as PDF generation, data export, and real-time communication using WebSockets (WSS). A significant project I contributed to was for a client with strict accessibility requirements, which led me to deepen my knowledge of web accessibility best practices. I also leveraged Firebase extensively, utilizing Firestore rules, Cloud Functions, Storage, and Analytics. Beyond technical skills, I have collaborated with teams of various sizes and worked closely with QA testers, UX/UI designers, data analysts, and other team members.

Junior Full-Stack Developer

GOOD
2021.08 – 2022.10

I was responsible for developing and maintaining existing functionality, primarily using Next.js, Redux, and Node.js. Additionally, I implemented unit tests using Jest and had the opportunity to try some AWS services. Working in this environment provided me with valuable insights into professional software development. I gained experience in collaborating within a team of developers, estimating the complexity of new tasks, and improving my remote work efficiency by effectively planning and managing my time.

Education

Bachelor of Engineering in Computer Science

MAŁOPOLSKA UCZELNIA PAŃSTWOWA IM. ROTMISTRZA WITOLDA PILECKIEGO W OŚWIĘCIMIU
2020.10 - 2024.02

Tech stack

Frontend

TypeScript, HTML 5, React, Svelte, Next.js, Vue.js, Tailwind, CSS3, Zustand, Redux.

Backend

Node.js, Express.js, Firebase, Supabase, WSS, Socket.io.

Languages

Polish - Native
English - C2/C1
